

USAMA BIN JAFAR PK

Web Developer

✉ usamabinjafarpk267@gmail.com ☎ +91 7306407447 🌐 www.reallygreatsite.com
📍 Malappuram, Kerala, India 🔄 <http://bit.ly/usamagithub> 📄 <https://bit.ly/usamalinkedin>

I am seeking to join a progressive organization where I can apply my technical skills and embark on a challenging career path. I aspire to be part of a high-performing team dedicated to achieving goals, which will also fulfill my passion for continuous learning.

Experience

Web Developer trainee

July 2023-present

- KKMSOFT PVT LTD
Trivandrum, Kerala

Projects

Ex-Books

- The website facilitates the exchange and sale of used books, including novels, journals, etc., and also offers the option to rent books.
- Developed using Next.js for the frontend and Supabase for the backend.

Sketch to design using machine learning

- The web application utilizes machine learning techniques to generate wireframes from rough user-drawn sketches as a design tool.
- Developed using Next.js for the frontend , Supabase for the backend , PyTorch as machine learning library and Konva for canvas framework

Netflix Clone

- This is a clone of Netflix with basic functionalities.
- The project was developed with the aim of learning about React and its functionalities.
